# It's as much fun to empty as it is to fill up.

A motorcycle should be fun to ride, not just fun to fill up.

With that thought in mind we built the economical yet exhilarating TwinStar.<sup>TM</sup>

It has all the advantages of a smaller motorcycle, yet it comes with many of the features you expect from our larger ones. Like a relaxed and uncramped riding position, an easy to use electric starter and a capacitor discharge ignition that provides a hotter spark and never requires maintenance.

You might even find that a smaller bike is a benefit all by itself. Especially if it's your first one.

It's lighter so it's easier to handle. Its seat height is lower so you can put both feet securely on the ground.

And of course it gets enough miles per gallon to make you doubt your arithmetic.

But that doesn't mean it's slow. On the contrary, the TwinStar's overhead cam engine is big enough and strong enough to carry you right onto any freeway or highway in the country.

Even with a passenger.

Which is good news to anyone who enjoys a little company. Because filling up the back seat can be even more enjoyable than filling up the tank.

1. An engine with a well-deserved reputation for economy, reliability and fun.
2. No-maintenance capacitor discharge ignition.
3. Extra comfortable, extra low custom seat.
4. Convenient electric starter.
5. Wide ratio four-speed transmission.
6. New five-way adjustable rear shocks. So you can match the ride to the load you're carrying.
